Summary

Junior Front-End Developer

Experience

Junior Front-End Developer Trainee

TeachMeSkills

Jan 2023 - Present (7 months)

HTML:

- Creating semantic HTML markup.
- Working with forms and input elements.
- Understanding the DOM structure and interacting with it using JavaScript.

CSS:

- Applying styles using CSS selectors and properties.
- Positioning elements and managing layout.
- Creating responsive designs using media queries.

Less Sass/Scss:

- Utilizing the Sass/SCSS preprocessor to simplify CSS authoring.
- Using variables, templates and mixins for reusable styles.
- Nesting rules and using nested selectors.

Git:

- Creating and initializing Git repositories.
- Familiarity with common Git commands and branching strategies.
- Collaborating with team members using Git repositories.

JavaScript:

- Understanding JavaScript syntax, data types, and control structures.
- Manipulating the DOM and handling events.
- Working with JavaScript objects and arrays.
- Understanding of event handling, event listeners, and DOM traversal methods.
- Knowledge of object-oriented programming concepts.

REST API:

- Making HTTP requests and interacting with RESTful APIs.
- Handling different request types and managing API responses.
- Handling API errors and implementing error handling mechanisms.

TypeScript:

- Understanding of TypeScript syntax, features, and benefits.
- Ability to define and enforce data types for variables, functions, and objects.

-Knowledge of using interfaces, classes, and modules to create modular and scalable code structures.

Education

International Institute of Management and Business

Bachelor's degree, Economics

Sep 2016 - Jun 2021

Skills

Scss • Sass • Less • JavaScript • HTML • CSS • Git • TypeScript • REST API
