Hard Skills

- JavaScript
- React
- REST API
- TypeScript
- HTML
- CSS/Less/Sass-Scss
- Git
- Redux
- Webpack
- Parcel
- Node.js

Language

Russian
English(Pre-Intermediate)

Education

TeachMeSkills

Front-End Developer

Jan 2023 – Oct 2023

International Institute of Management and Business

Bachelor's degree, Economics

Sep 2016 – Jun 2021

Experience

TeachMeSkills

Front-End Developer Apprenticeship

Jan 2023 – Oct 2023

Skills:

- Proficient in HTML, CSS (Less, Sass, SCSS), and JavaScript, with a focus on building responsive and visually appealing websites.
- Experienced in TypeScript for type-safe JavaScript development.
- Skilled in RESTful API development and integrating APIs into web applications.
- Proficient in React and Redux, including Redux Toolkit for efficient state management in front-end applications.
- Experienced in bundling and optimizing web assets using Webpack and Parcel.
- Familiar with server-side development (Node.js) and database management with MongoDB.
- Experience working with Figma, collaborating with designers and implementing UI/UX designs into code.

Freelance Frontend Developer

March 2024 – September 2024

- Developed and maintained responsive web applications using React and TypeScript for various clients.
- Collaborated with clients to gather requirements, design user interfaces, and implement features, ensuring seamless user experiences.
- Tested and debugged websites, improving performance and resolving bugs in existing codebases.
- Customized and optimized UI components based on client specifications, ensuring cross-browser compatibility and responsiveness.
- Used Figma to accurately convert design mockups into functional and responsive front-end features.

Personal Projects

- CashFlow Budget Management: Developed a budget management app for effective financial tracking using React, TypeScript, Redux, Firebase for authentication, and MongoDB for data storage.
View project on my CV site: <https://main--cv-hanna-muryna.netlify.app/>
- European-Herald: Created a news website with React, TypeScript, and Redux, and Firebase for user authentication, featuring dynamic content fetching and user interaction.
View project on my CV site: <https://main--cv-hanna-muryna.netlify.app/>
- Oven_Opera: Designed a pizza delivery website using JavaScript and SCSS, focusing on user-friendly ordering experiences.
- View project on my CV site: <https://main--cv-hanna-muryna.netlify.app/>
- MessChat: Built a real-time chat application with React, Node.js, and WebSockets, enabling seamless and instant user communication.
- View project on my CV site: <https://main--cv-hanna-muryna.netlify.app/>

About Me

I am a beginner frontend developer with experience in creating responsive and visually appealing websites. I have strong skills in HTML, CSS (including Less, Sass, and SCSS), and JavaScript, as well as experience with TypeScript for safe development. I can create RESTful APIs and integrate them into web applications, and I am skilled in using Redux Toolkit for effective state management.

I also have experience with building and optimizing web resources using Webpack and Parcel. I am familiar with server-side development using Node.js and working with MongoDB. Using Figma, I implement UI/UX designs into code. I always strive to improve my skills and knowledge in frontend development and I am interested in new technologies.
